1 Cup

JED & his 2 Cup

2 Cup

Specialty Dishes for the “fast eating” dog

EAT SLOWER® DOG DISH—1 Cup
 Holds 1 cup of dry food, spread evenly,
 with little or no stacking of the food.

EAT SLOWER® DOG DISH—2 Cup
 Holds 2 cups of dry food, spread evenly,
 with little or no stacking of the food.

Food that is **not stacked** makes dogs use their tongue, lips and teeth. They **can't** just grab a mouthful and **gulp it** down! This **slows** their **eating** and **changes** their **eating style**. It also reduces the possibility of **gulping air** with their food, which can **lead to bloat**. Dog care professionals recommend feeding 2 or 3 **smaller** meals daily rather than 1 large meal each day.

The EAT SLOWER® DOG DISH is a **patented** dish that was specifically designed to help fast-eating dogs learn to eat at a slower pace. Most dogs **increase** their **eating time** from **100-500%** the first time they use this dish; then a gradual increase over the next few months. **Puppies** seem to **learn faster** than the adult dogs. Our dog, Jed, went from a dog food gulper to a gentleman diner with this dish.

These dishes are **made in the USA**. They are **FDA approved** for food and drink. They stack well with stops inside the cone. The color is Warm Granite with small dark flecks. The color, combined with a medium texture finish on the outside and a very light frost on the inside, results in an **attractive feeding dish**. These are large dishes, 13” across the 2-Cup and 9.5” across the 1-Cup.
